Schedule Your M.R.I now!

Barbara Zaricor *Patient Access Team Lead II*

Barbara Zaricor currently serves as Patient Access Team Lead II at Cleveland Area Hospital and has been with us for two years. Her kind and caring attitude towards everyone she meets is a great asset to our organization and we love having her on our team!

Barbara has over 20 years of experience in customer service, sales, and computer skills. She is also a notary public with the State of Oklahoma!

After moving here to Cleveland from Sand Springs, she soon began her career with us and realized her love for working in a healthcare setting. Barbara tells us "I love working the ER side, seeing the different aspects of injury and illness. I also enjoy learning new aspects of my job." Working in patient access can be challenging, but also proves to keep day to day work interesting and can provide many learning experiences. Barbara wishes to continue learning more about healthcare and complete a degree in healthcare and IT.

In her free time, Barbara can be found spending time with her husband, five children, and friends, riding four-wheelers, and taking their boat out. She also enjoys the 'hometown feel' of Cleveland and participating in many of its small events. Thank you for your dedication to quality patient care, Barbara! We appreciate all that you do

Jamie Petrunak *Radiology, C.T., and Bone Densitometry Technologist*

Cleveland Area Hospital would like to congratulate Jamie Petrunak for continuing her education and skills. After 9 years of doing C.T.s, completing 16 hours of Structured Education, passing a 165 question exam and documenting 125 exams of different criteria, she has earned registry in Computed Tomography from ARRT! In addition to her new C.T. Technologist credentials, she is also a Radiology Technologist and the only registered Bone Density Technologist in our organization!

We are proud to offer her services here and greatly appreciate her dedication to our advancement and growth. Thank you Jamie and keep up the great work!

A Special Thanks...

Thanking our community businesses for their generous support:

On July 14th, we were presented with a spontaneous, generous gesture by Tim and Jenni Hough at Cleveland's State Farm Insurance office. Tim went around the business community and was met with an outpouring of support to contribute in an effort to extend appreciation and support to our organization. The following message was included...

"In sincere appreciation of the hard work, support and care you provide to our community, we wanted to express our thanks by providing numerous gift cards to support our local businesses and to present these encouragements to your staff to use individually or collectively as you see best. Please use this gift to encourage those who have poured out selflessly.

Our thoughts and prayers continue to surround you as you minister care, comfort and healing.

Thank you for your service,

Tim Hough, State Farm Insurance & Friends"

In addition to Tim and Jenni Hough, we would like to thank Celebrations, Dari Diner, Hungry Eyes, Josie's Express, Los Molcajetes, Shiloh's and Walmart for their generous support.

On July 16th, we held a drawing on Facebook Live for members of our team.

Cleveland Area Hospital and Lake Area Medical Associates could not be more proud to represent such a wonderful community. We thank you all for your support as we continue to strive for our mission of providing exceptional, high quality care from employees who have a spirit of caring in their heart.

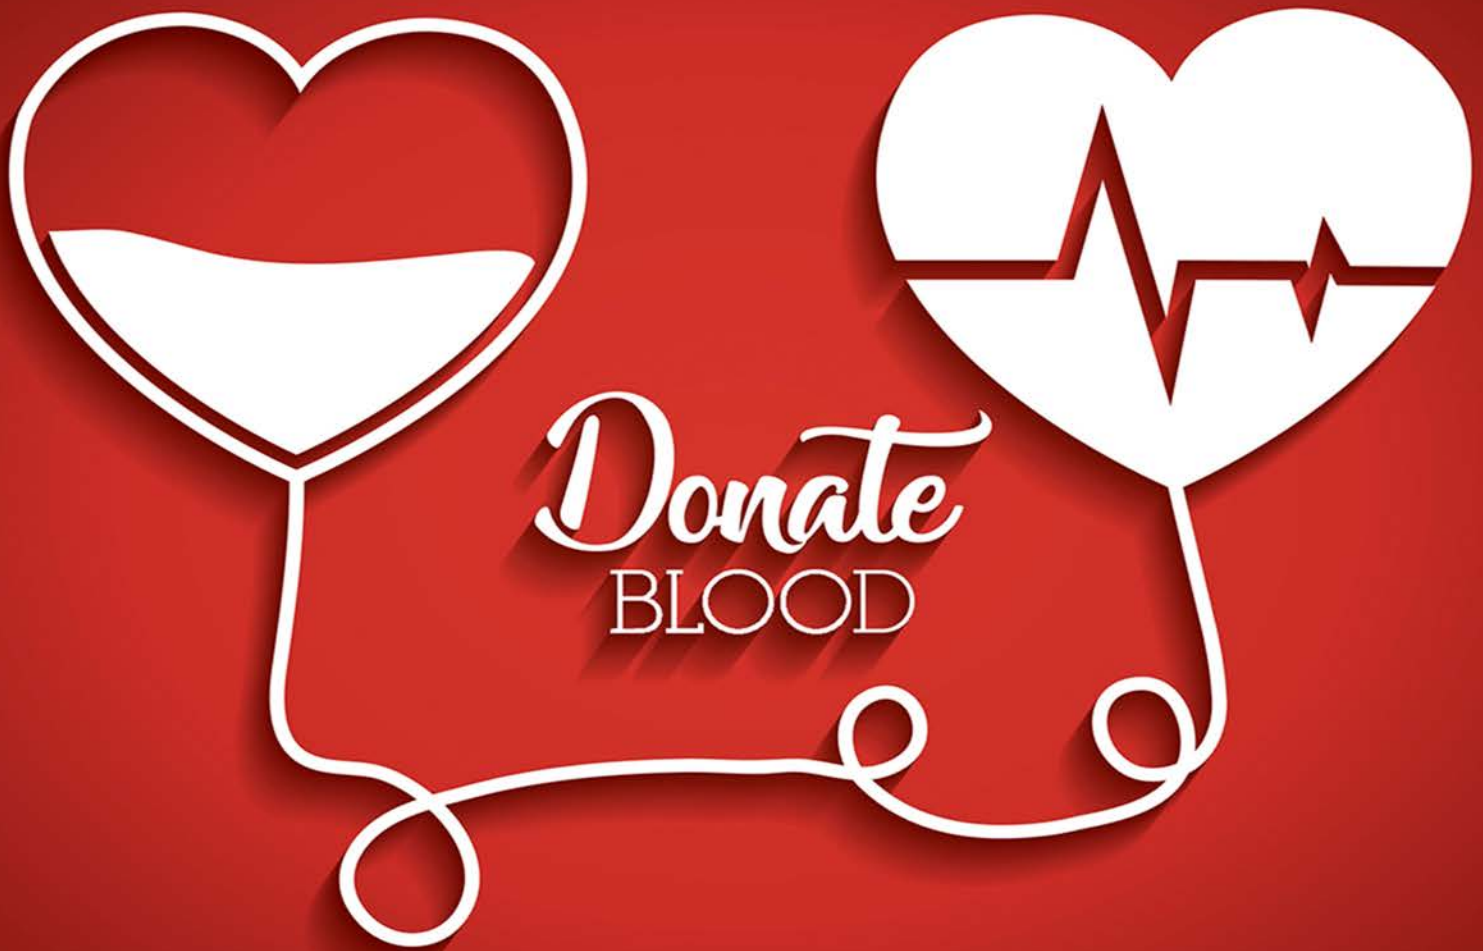

Your support counts!

Cleveland Area Hospital is proud to offer Magnetic Resonance Imaging (M.R.I.) services every Wednesday by partnering with Alliance Mobile Imaging Services.

To schedule your appointment,
call 918-358-2501 Ext. 4702

Blood is one of the most precious, life saving gifts that someone can give. While not all people are qualified to donate, just one person can save up to three lives each time they donate.

If you are over 17, weigh at least 110 pounds, have never used non-prescription self-injected drugs, do not have hepatitis and are not at risk for aids, you are likely a candidate to be a hero.

Blood donations are needed for women with pregnancy complications, children with severe anemia, people with severe trauma, complex medical and surgical procedures, cancer patients and many other complications.

Since blood donations can only be stored for a limited amount of time, it is crucial that we maintain a regular flow of donations to preserve a quality supply for emergency situations.

While donating blood can save the lives of many, it can also offer benefits to the one donating. According to a report by the Mental Health -

JULY 2020

Foundation, helping others can reduce stress, improve your emotional well-being, benefit your physical health, reduce the sense of isolation and provide a sense of belonging to your community.

Here in our community, the Cleveland Area Hospital Auxiliary can be found hosting its 11th year of blood drives at the First Christian Church. Blood drives are held the second Thursday of even months with the next event being held on August 13th, 2020.
